As a junior majoring in Computer Science with a strong interest in integrating technology across diverse fields, I am deeply passionate about using my technical skills to innovate and enhance the way digital systems interact with human needs. My academic journey and practical experiences have equipped me with a robust foundation in programming, systems analysis, and software development, particularly in the contexts of user interface design and mobile app development.

My dedication to technology is complemented by a commitment to ethical practices in software development, emphasizing the importance of creating secure, efficient, and accessible digital solutions. This commitment is evidenced through my work on projects that prioritize user privacy and data security, aiming to set new standards in the ethical use of technology.

Beyond coding, I explore the intersection of computer science and visual arts, employing my skills in graphic design to create intuitive and engaging user experiences. This blend of technical prowess and creative acumen enables me to deliver solutions that are not only functionally robust but also aesthetically compelling.
